The computer controlled systems ensure an even coat weight across the entire film at 35gsm of adhesive coat weight. The calculation we conducted to ensure correct dosing is as follows:

Total coated film area is 327m²
Total adhesive used is 11445 grams (840m² x 35gsm)

A 32mm x 32mm patch has a surface area of 1024mm², therefore per sqm of film there is 976.56 patches

976.56 Patches per m² x 327m² coated = total 319,335 patches coated by area.
